

Operating Instructions for use of MARTOR-Merak

MARTOR-Merak

Fully Automatic Blade Retraction
Blade will automatically retract after cut is complete - even if the user continues to hold the squeeze lever.

Blade change button
Easy tool-free blade change.

Squeeze lever
The blade is released for cutting by pressing the red lever.

Safety lock
The squeeze lever can be locked, preventing the blade from accidentally extending! This guarantees maximum protection against injuries when the knife is not in use, or during transportation.

= unlocked
 = locked

Quadruple-use Blade
Perfectly sharpened Solingen high-quality steel blade for simple and extended cutting applications.

This knife easily cuts:

- > Cardboard (up to double-walled)
- > Plastic box strappings
- > Cardboard box adhesive tapes
- > Foil and plastic bags
- > Stretch wrap
- > Shrink wrap
- > Paper and sheet material and more.

Useable in any company:

- > Incoming goods and packages department
- > Warehouse
- > Order picking
- > Production

Handling and use:

Unlock the red safety lock by depressing . Squeeze the lever to extend the blade.

Cut with the blade into the material (e.g. carton). Ensure sufficient pressure is applied when cutting to activate the auto retract mechanism. It will audibly click into place.

Blade will automatically retract after the cut is complete - even if the user continues to hold the squeeze lever.

Engage the safety lock when not using the knife (drücken).

Blade change:

Begin with knife in locked position by pressing . Slide black blade change button toward back of the knife. While depressing this button...

...pull squeeze lever out and continue until it stops. Flip open black blade cover.

Reverse or replace the blade making sure to locate it on the pin. Close the blade cover...

...and rotate the squeeze lever back into the handle until it **snaps** in place. Unlock knife and test the squeeze lever to be sure it is working properly.

Waste management of blades:

Used blades must be put into an approved disposal container.

MARTOR SAFEBOX No. 108000 - another novel contribution to SAFETY: Designed for SAFE deposition of used blades. To empty the contents, fold the „outer case“ back by 180 degrees.

The transparent cover can now be opened and the contents be emptied, preferably, into the MARTOR USED BLADE CONTAINER No. 9810 - WALL MOUNT BRACKET optional.

It is important that the cutter is clean and free from foreign debris to ensure the safety feature will work properly.
